

LIQUEFIED NATURAL GAS

With Allegro, you'll gain greater efficiency than ever

ALLEGRO IS YOUR ADVANTAGE

With Allegro's commodity trading and risk management software, the entire life cycle of liquefied natural gas, including production, transportation, loading, storage and regasification, can be managed with confidence.

The Allegro platform is made for the complex requirements of front, middle and back office energy professionals.

By using Allegro, you'll be ready to oversee trading, actualization, billing and inventory - in short, this is the way to a complete view of your LNG business.

BUILT FOR LNG

Allegro's commodity management solution is designed to improve your operational efficiency and visibility by integrating all of the LNG information you need into one system for trades, contracts, liquefaction and regasification, scheduling, physical logistics and financial requirements. At the same time, Allegro offers distinct benefits across departments. When traders, operations teams and compliance managers need a clearer view of their line of business, the Allegro CTRM system represents a new and better way of working.

TRADING

Improved efficiency on trades and customizable trade templates

Accurate trade entry and confirmation

OPERATIONS

Ability to model input, output and losses for liquefaction and regasification

Tracking of all aspects of shipments between terminals

ACCOUNTING
