

POWER

Get the right platform for growth and risk management

ALLEGRO IS YOUR ADVANTAGE

Too many times, the traditional tools for energy trading and risk management aren't enough for modern power companies.

Allegro understands this, and that's why our software exists: To manage risk for power companies and to connect their teams of traders, schedulers, accountants and compliance personnel.

Allegro is a comprehensive solution that provides users across the front, middle and back office with a platform for accuracy, control and efficiency, while simultaneously managing risk and enhancing the potential for growth.

BUILT FOR POWER

With Allegro, power professionals across the front, middle and back offices will find an array of benefits when they rely on our commodity trading and risk management software, including detailed position management data, support for reporting requirements such as ASC 820, and mark-to-market and value-at-risk calculation capabilities. Plus, our platform is designed for seamless integration with North American ISOs, connecting your business no matter where it operates.

TRADING

Integration with trading platforms
Efficient and accurate trade capture of physical and financial transactions

OPERATIONS

Usage management for capturing historical and actual usage
Analysis that spans the position life cycle

ACCOUNTING

Control and accuracy to certify financial reports with confidence
Tracking abilities that include a comprehensive audit trail

RISK MANAGEMENT

Ability to view credit, market and operations risk data
Profit-and-loss reports showing total value of positions
