*Allegro* MOBILE

With Allegro Mobile, traders, risk managers and IT professionals will be more efficient than ever - and there will be no more missing what matters most. Allegro mobile will give users one of their most valuable commodities back: time.

**THE OVERVIEW**

Allegro's commodity trading and risk management software is built to help you confidently manage the complexity of multibillion-dollar global markets. But considering those markets don't stop when you leave the office for the day, how can you be truly connected to the up-to-the-minute information you need and be ready to respond when required?

Today's commodity professionals need technology that ensures rapid and deep visibility. That's why we're offering a new platform that extends the core Allegro application and provides instant intelligence: Allegro Mobile.

**To succeed in today's commodity space, you have to be in the know. With Allegro Mobile, you will be.**

**THE FEATURES**

- View data at the summary or detail level; ability to drill in and out of the data
- Confirm receipt of messages and complete actions from notifications
- Approve workflow
- Filter dataset and search functions
- iOS and Android mobile operating systems are supported
- Security through MS Azure Active Directory
