ALLEGRO SELECTED AS A CATEGORY AWARD WINNER IN CHARTIS RESEARCH RISKTECH100 REPORT

Chartis Research Names Allegro a Category Award Winner in Commodity Trading for Another Consecutive Year

DALLAS, TX, Nov. 28, 2017 – Allegro Development Corp., a global leader in commodity trading and risk management (CTRM) software, today announced that it has been selected as the category winner for Commodity Trading in the 2018 Chartis Research RiskTech100® Report.

The Chartis RiskTech100® Report is globally acknowledged as the most comprehensive independent study of the world's top risk and compliance technology firms. To determine the category winners, Chartis examined the completeness of each vendor's product offering, as well as their market potential.

Rankings in the report are based on a vendor's ability to compete in a rapidly changing risk technology marketplace with sustainable product, technology and business strategies. Additionally, category winners are selected according to the range and diversity of their products, along with their sector coverage and financial strength, which helps them to cope with volatility in a particular commodity or region.

Frank Brienzi, CEO, Allegro Development

"We are proud to announce another consecutive year of being named the category winner in Commodity Trading in the 2018 Chartis Research RiskTech100® Report. This acknowledgement further reinforces Allegro's expertise in providing extensible and forward-compatible commodity trading and risk management solutions for its customers."

Rob Stubbs, Head of Research, Chartis Research

"After carefully surveying the CTRM landscape, the Chartis Research team determined that Allegro Development should once again be chosen as the category award winner in commodity trading based on its innovative and proven product solutions, current market share, and future potential."

About Chartis Research

Chartis Research is the leading provider of research and analysis on the global market for risk technology. It is part of Infopro Digital, which owns market-leading brands such as Risk and Waters Technology. Chartis' goal is to support enterprises as they drive business performance through better risk management, corporate governance and compliance.
